

Adopt **NitroSell** for your multi-channel solutions

THE RIGHT BLEND OF SELLING

"I love our WebStore because it's a real selling site and the more people that view it, the more we're going to sell. We receive great support from NitroSell's implementation team, and looking to the future, I think personally it's the best decision we've ever made."

- **Ian Crawley, Owner, Leslies.**

"Microsoft Dynamics RMS and Nitrosell's eCommerce solution help retailers handle all sales transactions from both their physical and online stores. The stock control functionality means that the WebStore updates availability information almost instantly, removing any risk of disappointing customers by cancelling orders. Having access to detailed and timely sales information helps assist with product ranging and stocking levels, increasing profitability and customer service."

- **Scott Storey, Managing Director, CTS.**
